4. *Welcomes* the efforts made to date by UNICEF in working with programme countries to maximize the impact of the particular expertise of UNICEF when strengthening joint programming, aimed at improving the coherence of the United Nations at field level, programming efficiency, avoiding duplication and reducing transaction costs for programme countries and thus to contribute to better overall results, and *encourages* the Executive Director to continue to work with Governments and other partners towards that end;

5. *Emphasizes* the importance that the Executive Board attaches to UNICEF using joint programming as a tool for supporting the implementation of national development plans, including Poverty Reduction Strategies where they exist, through a more concerted approach under the Common Country Assessment and United Nations Development Assistance Framework, towards achieving the internationally agreed development goals, including those contained in the Millennium Declaration;

(c) Promote common monitoring and reporting processes to governing bodies and joint approaches to evaluations;

7. *Takes note* of the efforts of UNICEF in contributing to the continued development by UNDG of a common framework, to include a common reporting framework, for joint programmes aimed at improving the impact and efficiency of United Nations agencies' efforts, in partnership with and to support national Governments, including UNICEF efforts to identify circumstances under which joint programmes might be a useful tool and what improvements in development impact would be achieved via use of joint programmes;

## 2005/7. UNICEF/WHO Global Immunization Vision and Strategy

*The Executive Board,*

*Having considered* the report on the draft immunization strategy (E/ICEF/2005/9 and WHO A58/12),

*Alarmed* that globally and in some regions immunization coverage has increased only marginally since the early 1990s, and that in 2003 more than 27 million children worldwide were not immunized during their first year of life;

*Recognizing* that each year 1.4 million children under five years of age die from diseases preventable by currently available vaccines;

*Further recognizing* that each year an additional 2.6 million children under five years of age die because of diseases potentially preventable by new vaccines;

*Welcoming* the achievements of the accelerated disease-control initiatives against poliomyelitis, measles, and maternal and neonatal tetanus in immunizing previously unreached populations, and *noting* that these initiatives have established extensive networks on which surveillance for other disease and health trends can be built or expanded;

*Concerned* that, owing to financial, structural and/or managerial constraints, national immunization programmes fail to reach all children and women eligible for immunization, underuse many existing vaccines, and are not widely introducing new vaccines;
